Course Migration

by eLearning Support Team

Automatic course migration process

Support process

Level of support depending on the complexity of the migrated courses
Automatic migration

- Course migration will be run as an automatic process - moving your WebCT CE 4 course to the new LMS Blackboard Learn 9.1
- Here is a demo video showing you the BEFORE and AFTER migration courses
- The course included many commonly used WebCT features like, discussion forum, online quiz/survey, downloadable course materials, link to external files/websites and images

Review of the migrated course

- Course migration will move and match data from your WebCT 4 course content / tools to the new Blackboard but there are things that cannot be migrated:
  - Graphic Design customisation of the HOME Page
  - Chinese Characters (sometimes)

The following also won’t migrate BUT this is as per current practice when re-using an existing WebCT course:
- User data (data link to a specific user)
- External materials (links to other system)

Items cannot be migrated

1) User data:
  - Mail
  - My Grades
  - Student Homepage
  - Statistics
  - Notes
  - Group Members
  - Discussion Forum
  - Calendar entry

2) External materials (links to other system)
  - Applications reside in other server/system
  - External links
What to do after my course is migrated?

FAQ
